#### **Foreword**

This report presents the final results of the 1991 Population Census in respect of District Board districts.

It contains statistics organized in two parts: the "Summary Statistics" part which provides the population profile of each District Board district and the "Basic Tables" part which provides information on the detailed characteristics of the population in each District Board district.

The 1991 Population Census comprised a 100% enumeration of all persons by age and sex and a one-inseven sample enquiry on a broad range of demographic and socio-economic characteristics of the population. All households in Hong Kong were enumerated during the tenday period from 15 to 24 March 1991. The Census results provide a snapshot of the size and characteristics of the population on the Census reference date of 15 March 1991.

District Board districts are declared by the Governor-in-Council for District Board elections. The maps showing the boundaries of District Board districts are contained in another Census publication entitled "Boundary Maps Complementary to Tabulations for District Board Districts and Constituency Areas".

Another report on the geographical breakdown of the Census results, entitled "Basic Tables for Tertiary Planning Units", will be published at the same time with this report. That report consists of three separate volumes covering Hong Kong Island, Kowloon and New Kowloon and the New Territories respectively. More detailed statistics and analysis of the Census results covering the whole of Hong Kong will be available in the publications "Main Tables" and "Main Report" which will be released later this year.

#### **Explanatory Notes**

#### Introduction

The 1991 Population Census comprised a 100% enumeration of all persons by age and sex and a one-in-seven sample enquiry on a broad range of demographic and socio-economic characteristics of the population. Data on the count of population, households and living quarters are obtained from the complete enumeration, whilst data on their detailed characteristics are provided by estimates derived from the sample enquiry. In preparing the tabulations, an adjustment has been made as necessary to allow for persons in non-contact households.

#### Structure of the report

The statistics are organized in two parts. The "Summary Statistics" part covers 25 data items on demographic, education, labour force and household characteristics, which together provide the population profile of each District Board district. Seven data items are based on the complete enumeration. These are numbers of residents, enumerated residents and domestic households, percentages of persons by age and average domestic household size. Other data items are based on the sample enquiry.

The "Basic Tables" part provides information on the detailed characteristics of the population in each District Board district. Each of the basic tables is divided into two sections, namely "Statistics based on complete enumeration" and "Estimates based on sample enquiry". Information covered is outlined below:

#### Statistics based on complete enumeration:-

- . Type of living quarters
- . Household size
- . Age and sex of enumerated residents

#### Estimates based on sample enquiry:-

- . Household composition
- . Tenure of accommodation
- . Monthly household income
- . Monthly household rent
- . Usual language/dialect
- . Marital status
- . Educational attainment
- . Activity status
- . Occupation
- . Industry
- . Monthly income from main employment

It may be noted that the total numbers of living quarters, households and population given in the first section are obtained from the complete enumeration, whereas those given in the second section are based on estimates derived from the one-in-seven sample enquiry (please see footnote\* for further explanation of the method).

#### Coverage of the report

The population figures covered in this report, other than the number of residents given in the "Summary Statistics" part, refer to the enumerated resident population of the whole territory, including 11 102 enumerated marine residents. The following categories of persons counted in the Census are not included in the report:

- (1) 151 833 residents who were temporarily away from Hong Kong on the Census reference date of 15 March 1991;
- (2) 35 823 transients; and
- (3) 51 847 Vietnamese migrants including Vietnamese refugees, Vietnamese migrants having been screened out and those pending determination of refugee status, ex-China Vietnamese illegal immigrants, Vietnamese migrants rescued by ocean-going vessels and children born in Hong Kong to the above categories of Vietnamese migrants.

The exception mentioned above, viz. the number of residents given in "Summary Statistics", refers to the entire resident population (i.e. all persons usually residing in Hong Kong including those temporarily away from Hong Kong on the Census reference date).

Living quarters covered in this report are those occupied on the Census reference date. The figures on households refer to domestic households, which accounted for 98.6% of the enumerated resident population. The rest of the population were in collective households. The 11 102 enumerated marine residents were staying on board of 2 179 vessels on the Census reference date. In this connection, no type of living quarters, rent and tenure statistics are available.

#### Constituency area statistics

All information contained in this report is also available by constituency area. Readers who are interested in such tabulations may contact the Census and Statistics Department direct.

To achieve consistency between total counts obtained from the complete enumeration and estimates derived from the sample enquiry, the "ratio estimation" method is employed. (Readers interested in the details of this method may wish to refer to standard texts in survey sampling). Total counts at the District Board (DB) district level were chosen as controls when applying the method. The control process ensures that estimates derived from the sample for each DB district are consistent with the district total counts. However, in estimating the number of households by household composition for individual DB district based on the sample enquiry, the blow-up factors were derived from the district control totals with reference to type of living quarters instead of household size category. Therefore, the total count of households of "household size one" obtained from the complete enumeration and the total number of "one-person" households provided by estimates derived from the sample enquiry are not necessarily identical.

#### Bilingual presentation

This report is presented basically in bilingual form with the exception of "Basic Tables". There is at the end of the report a "Glossary" of the terms presented in the "Basic Tables" part given in both English and Chinese. This will facilitate readers who want to refer to the tables in Chinese.

#### **Definition of terms** (in alphabetical order)

(1) Activity Status: This refers to the economic activity status of a person. Population can be divided into two main groups, economically active population (i.e. the labour force) and economically inactive population as follows:

Economically active population: This comprises the employed (i.e. the working population) and the unemployed.

The working population refers to persons aged 15 and above who performed some work for wage/salary or were on leave/holiday during the seven days before enumeration in the 1991 Population Census. The working population can be distinguished into:

Self-employed: A person who works on his own account, neither employed by someone else nor employing others.

Employer: A person who works on his own account and employs one or more persons to work for him.

Employee: A person who works for wage/salary in local/overseas government, private company or government subsidized organization. Domestic helpers working for wage are included in this category.

Unpaid family worker: A person who lives with his family and does work (not domestic work) as part of the family enterprise in return for food and lodging.

The unemployed persons refer to persons aged 15 and above and not of independent means who were not at work during the seven days before enumeration in the Census but were seeking work and available for work. This excludes those who were on leave/holiday during the reference period.

Economically inactive population: This refers to persons who did not have a job and were not at work during the seven days before enumeration in the Census, excluding persons who were on leave/holiday during the seven-day period and persons who were unemployed. Included in this category are home-makers, students, persons of independent means, retired persons and other economically inactive persons.

Home-maker: A person who looks after the home without pay.

Student: A person who is studying full-time in school or other educational institution. Persons who are self-studying, or studying informal courses in miscellaneous training institutes or studying evening courses and were not working during the seven days before the enumeration of the Census are also included in this category. Student workers are classified as economically active persons and are not included in this group.

Of independent means: A person who does not have to work for a living. The cost of living is generally borne by rental receivables, savings, investment returns or remittances.

Retired person: A person who has worked previously but is not currently working because of old age.

Other economically inactive: Economically inactive persons not elsewhere classified, e.g. unpaid religious workers and persons who cannot work or do not seek work because of sickness or disablement.

- (2) Age: This is the number of complete years a person has passed since birth.
- (3) Attending School: Persons attending full-time schools or educational institutions.
- (4) Average Domestic Household Size: This refers to the average number of persons per domestic household. It is calculated by dividing the total number of persons who were found in domestic households on the Census reference date by the total number of domestic households.
- (5) Constituency Areas: These geographical areas are declared by the Governor-in-Council under the Electoral Provisions Ordinance, Chapter 367 on 24 July 1990 for District Board elections. There is a total of 210 constituency areas: 39 on Hong Kong Island; 69 in Kowloon and New Kowloon and 102 in the New Territories. For the purpose of the 1991 Population Census, population by constituency area refer to persons living on land only, i.e. persons enumerated on board marine vessels are excluded.
- (6) District Board Districts: These geographical districts are declared by the Governor-in-Council under the District Board Ordinance, Chapter 366 on 24 July 1990 for District Board elections. There is a total of 19 districts: 4 on Hong Kong Island; 6 in Kowloon and New Kowloon and 9 in the New Territories. For the purpose of the 1991 Population Census, population by District Board district refer to persons living on land only, i.e. persons enumerated on board marine vessels are excluded.
- (7) **Domestic Household:** A domestic household consists of a group of persons who live together and make common provision for essentials for living. These persons need not be related. If a person makes provision for essentials for living without sharing with other persons, he is also regarded as a household. In this case the household is a one-person household.

(8) Educational Attainment: This refers to the highest level of education ever attained by a person in school or other educational institution, regardless of whether he had completed the course. Only formal courses are counted as educational attainment. A formal course shall be one that lasts for at least one academic year, requires specific academic qualifications for entrance (with the exception of the degree courses offered by the Open Learning Institute of Hong Kong) and includes examinations for assessment purpose. The different levels of educational attainment are as follows:

No schooling: Including those who had never attended a formal course.

Kindergarten: Including all classes in kindergarten.

Primary: Including Primary 1 - 6 in all schools.

Lower secondary: Including Middle 1 - 3 in Chinese schools or Form 1 - 3 in English or Anglo-Chinese schools.

Tertiary (Non-degree courses): Including all certificate/diploma and higher diploma/endorsement certificate courses in technical institutes/polytechnics, associateship and other non-degree courses in polytechnics and other post-secondary colleges. Certificate/diploma courses in colleges of education and in the Hong Kong Technical Teachers' College and nurse training course are also included in this category.

Tertiary (Degree courses): Including all first degree courses and post-graduate courses in tertiary educational institutions in Hong Kong and overseas.

- (9) Enumerated Residents: These refer to those residents who were present in Hong Kong on the Census reference date of 15 March 1991. It does not include transients, Vietnamese migrants and residents who were temporarily away from Hong Kong on that date.
- (10) Households Composed of No Nuclear Family: These include one-person households, households with related persons forming no nuclear family and households composed of unrelated persons. Please also see the definition of Household Composition in (13).
- (11) Households Composed of One Nuclear Family: These include households composed of either one unextended nuclear family, one vertically extended nuclear family or one horizontally extended nuclear family. Please also see the definition of Household Composition in (13).
- (12) Households Composed of Two or More Nuclear Families: These include households composed of two or more nuclear families whose members may or may not be related in any way. Please also see the definition of Household Composition in (13).

(13) Household Composition: Household composition is derived from the information on relationship to the head of household of each person and the identification of spouse and parent-child relationships among members who were found in the household on the Census reference date. It shows the structure of a household in terms of the number of family nuclei and the relationship between a family nucleus and other related household members. A family nucleus is a married couple without children, a married couple with one or more never married children or one parent (either father or mother) with one or more never married children. The different categories of household composition are as follows:

One person: A household which has only one person found in the household on the Census reference date.

One unextended nuclear family: A household comprising one family nucleus without other related persons.

One vertically extended nuclear family: A household comprising one family nucleus with one or more related persons not of the same generation. It may or may not include other related persons of the same generation.

One horizontally extended nuclear family: A household comprising one family nucleus with one or more related persons of the same generation but without any other related persons of a different generation.

Two or more nuclear families: A household comprising two or more family nuclei whose members may or may not be related in any way.

Related persons forming no nuclear family: A household comprising related persons who do not form a family nucleus.

Unrelated persons: A household comprising unrelated person(s) with or without one or more related person(s) who do not form a family nucleus.

In the part "Summary Statistics", domestic households are classified into broader categories of household composition which include: (a) households composed of no nuclear family, (b) households composed of one nuclear family and (c) households composed of two or more nuclear families. Their corresponding definitions are given respectively in (10), (11) and (12) above.

For the 1981 and 1991 Population Censuses, household composition was derived based on the relationship of all persons who were found to be in the household on the Census reference date, whereas for the 1986 By-Census it was based on the relationship of all persons who usually lived in the household.

(14) Household Size: This refers to the number of persons found in the household on the Census reference date.

(15) Industry: This refers to the main kind of goods or services produced by the establishment in which a person worked during the seven days before enumeration in the Census. 第一組內所刊載的屋宇單位、住户及人口總數,是由全面點算所得,而第二組內所刊載的數字,則經由抽樣統計調查估算所得(有關估算方法的詳細解釋請參閱本頁註腳\*)。

#### 報告範圍

本報告所刊載的數字,除「簡要統計」部份內的居民總數外,都是指全港的實際點算居民,包括11 102名水上居民,下列各類人士並不包括在本報告內:

- (一)在普查日(即一九九一年三月十五日)暫時離港的 151 833名 居民;

上述「簡要統計」部份內的居民總數是指全港居民(即所有通常居港人士,包括在普查日暫時離港的居民)。

本報告包括在普查日所有有人居住的屋宇單位。住户數目是指家庭住户 ,佔實際點算居民人數百分之九十八點六,其餘的人口居住在團體住户內。 在普查日有11 102名水上居民住在 2 179艘船上。本報告內所刊載的屋宇單 位類型、租金及租住權等資料項目並不適用於水上居民。

#### 區議會選區統計數字

本報告所有的資料可按區議會選區匯總,讀者如有需要,可與本處聯絡。

<sup>\*</sup> 在進行估算時採用了「比率估計」方法,使由全面點算所得的數字與經由抽樣統計調查估算所得的一致。(讀者若有與趣進一步瞭解這方法,請參考一般有關抽樣統計調查的書籍)。採用這方法時,區議會分區的總計用作參考總數,確保了從各區議會分區經由抽樣統計調查估算所得的總計與其分區點算所得的總計脗合。但在估算每個區議會分區按住戶結構劃分的住戶數目時,所採用的放大倍數是以屋字單位類型而非住戶人數分組為依據。因此,由全面點算所得的「一人住戶」數目與經由抽樣統計調查估算所得的「單人住戶」數目並不一定相同。
