Foreword

This report presents the final results of the 1986 By-census conducted in March 1986. It contains basic cross-tabulations covering the broad range of demographic, social and economic characteristics of the population in Mong Kok.

Figures in this report refer to the land-based population of Hong Kong on 11 March 1986, excluding transients, Vietnamese refugees and residents who were temporarily away from Hong Kong on the census reference night. Due to lack of a complete frame of vessels, the sampling method employed in the By-census does not enable a separate estimate of the marine population to be made for each district. On the other hand, an adjustment has been made to the enumerated population in each district to allow for persons in non-contact households. A map showing the district boundaries of Mong Kok is attached to the report.

The 1986 By-census was based on a one-in-seven sample of the population. Estimates obtained from the By-census are subject to sampling error; and this is approximately in inverse proportion to the sample size. Therefore, figures for small districts have large sampling errors and should be used with caution.

Detailed analysis and interpretation of the By-census results will be presented in the Main Report to be published in late 1987.
