引言

1. 醫務衛生局委託香港大學公共衛生學院於 2023 年 3 月至 11 月期間進行了一項有關學生吸煙情況的學校統計調查，向學生搜集有關在學青少年吸煙比率、情況與趨勢的數據，以及吸煙學生的特徵。本文概述該統計調查的主要結果。

2. 是項統計調查的範圍包括所有學校（除特殊學校外）的小四至小六學生及中一至中六學生。統計調查以教育局提供的 2022/23 學年的學校名單作為抽樣框，採用比例分層隨機抽樣方法來抽選一個有代表性的學校樣本，以學校所在分區為分層變量，每區被抽選的中小學校數目乃按該區中小學校總數的比例得出。另採用不記名的自填問卷方式向學生搜集數據，學生被安排在課堂時於課室內填寫問卷。

3. 類似的統計調查曾分別於 2010 年 10 月至 2011 年 1 月、2012 年 10 月至 2013 年 4 月、2014 年 10 月至 2015 年 4 月、2016 年 11 月至 2017 年 6 月、2018 年 10 月至 2019 年 7 月及 2020 年 12 月至 2021 年 12 月期間進行。請注意，自 2012/13 學年起進行的統計調查涵蓋新高中學制下的中六學生，而 2010/11 學年進行的統計調查則涵蓋舊學制的中六及中七學生。因此，2012/13 學年及其後的統計調查中有關中六學生的統計數字不能直接與 2010/11 學年的統計調查中有關中六及中七學生的統計數字相比。

Introduction

1. The Health Bureau commissioned the School of Public Health of the University of Hong Kong to conduct a school-based survey on smoking among students from March to November 2023 to collect data on the prevalence, pattern and trend of smoking of youth smokers in schools and their profile. This note briefly reports the major findings from the survey.

2. The survey covered students from Primary 4 to 6 (P4-P6) and Secondary 1 to 6 (S1-S6) in all schools except special schools. School lists of the 2022/23 school year obtained from the Education Bureau were used as the sampling frame. Proportionate stratified random sampling was adopted to obtain a representative sample of schools, with district of school as the stratifying variable. The number of primary / secondary schools selected in each district is proportional to the total number of primary / secondary schools in that district. Self-administered anonymous questionnaires were used to collect data from students. The questionnaires were administered in classrooms during normal school hours.

3. Similar surveys were conducted from October 2010 to January 2011, October 2012 to April 2013, October 2014 to April 2015, November 2016 to June 2017, October 2018 to July 2019 and December 2020 to December 2021. It should be noted that the surveys conducted since 2012/13 covered students from S6 under the New Senior Secondary academic structure while the 2010/11 survey covered students from S6 and S7 under the old academic structure. Hence, findings of the surveys conducted in 2012/13 and onwards relating to S6 students are not directly comparable to findings in the 2010/11 survey relating to S6 and S7 students.

4. 一般而言，是項統計調查的數據搜集工作會於單一個學年內完成。然而，由於上一輪統計調查的數據搜集工作受到 2019 冠狀病毒病疫情的影響而延長並涵蓋兩個學年，今輪統計調查的數據搜集工作因此推遲開始。此外，部分學校未能在原定的統計調查期內安排於課堂時間填寫問卷，數據搜集工作亦需要延長並涵蓋 2022/23 及 2023/24 兩個學年。因此，在需要與過往統計調查結果作比較時，必須謹慎闡釋。

5. 是項統計調查成功訪問了共 70 間小學及 75 間中學。約 14 000 名小四至小六學生及 28 000 名中一至中六學生完成了問卷。在學校層面，小學及中學的回應率分別為 13% 及 16%。而在學校內的學生，小四至小六學生及中一至中六學生的回應率分別為 92% 及 93%。

概念及定義

6. 是項學校統計調查中，**吸煙**是指吸食傳統煙，並不包括電子煙、加熱煙、雪茄、手捲煙、水煙及用煙斗吸煙。學生的吸煙狀況是根據兩條問題決定：(i) 學生自稱的吸煙情況及(ii) 在過去 30 日，有多少日吸過煙。**現時有吸煙**的學生是指在過去 30 日內有吸過煙，並自稱現在有吸煙的學生（不包括只吸過一次或幾次煙和以前有吸煙的學生）。**曾經吸煙**的學生則指所有吸過煙的學生，無論以前或現在吸食多少。

4. In general, data collection work of this survey is completed within a single school year. However, due to the impact of the COVID-19 pandemic, the data collection work of the previous round had been extended to cover two school years. Hence, the commencement of the data collection work of this round has subsequently be delayed. In addition, some schools were unable to arrange the completion of questionnaires during normal school hours in the scheduled survey period and therefore the data collection work of this survey round had to be extended to cover both the 2022/23 and 2023/24 school years. Therefore, caution should be taken when making comparison with previous rounds, where necessary.

5. A total of 70 primary and 75 secondary schools were successfully enumerated in the survey. Some 14 000 students from P4-P6 and 28 000 students from S1-S6 completed the questionnaires. The response rates at school level for primary and secondary schools were 13% and 16% respectively. The response rates at student level were 92% for P4-P6 students and 93% for S1-S6 students.

Concepts and definitions

6. In this school-based survey, **smoking** refers to the smoking of conventional cigarette, not including e-cigarette, heated tobacco product, cigar, hand rolled cigarette, water pipe and pipe-smoking. Students' smoking status was identified using two questions: (i) the self-reported smoking status and (ii) the number of days smoked in the past 30 days. **Current smoking** was defined as any smoking in the past 30 days for those who reported that they smoked (excluding experimental smoking and ex-smoking). **Ever smoking** referred to any smoking in the past or at present, irrespective of frequency.

7. 學生吸食電子煙／加熱煙的狀況也是根據兩條問題決定：(i) 學生自稱的吸食電子煙／加熱煙情況及(ii) 在過去 30 日，有多少日吸食過電子煙／加熱煙。**現時有吸食電子煙／加熱煙**的學生是指在過去 30 日內有吸食過電子煙／加熱煙，並自稱現在有吸食電子煙／加熱煙的學生（不包括只吸食過一次或幾次電子煙／加熱煙和以前有吸食電子煙／加熱煙的學生）。**曾經吸食電子煙／加熱煙**的學生是指所有吸食過電子煙／加熱煙的學生，無論以前或現在吸食多少。

8. 是項學校統計調查有關「吸煙」的定義與主題性住戶統計調查所採用的定義有所不同。有關主題性住戶統計調查就「吸煙」所採用的定義，請參閱本報告書的註釋。

數字的捨入

9. 由於四捨五入關係，統計表內個別項目的數字加起來可能與總數略有出入。

統計調查的主要結果

吸煙情況

小四至小六學生

10. 曾經吸煙的小四至小六學生佔 2.2%，而 2020/21 學年的比例為 2.3%。曾經吸煙的男生比例較女生高。（表 1 及 2）

7. Students' e-cigarette / heated tobacco product use status was also identified using two questions: (i) the self-reported e-cigarette / heated tobacco product use status and (ii) the number of days used e-cigarettes / heated tobacco products in the past 30 days. **Current e-cigarette / heated tobacco product use** was defined as any e-cigarette / heated tobacco product use in the past 30 days for those who reported that they used e-cigarette / heated tobacco products (excluding experimental e-cigarette use / heated tobacco product use and ex-e-cigarette use / ex-heated tobacco product use). **Ever e-cigarette / heated tobacco product use** referred to any e-cigarette / heated tobacco product use in the past or at present, irrespective of frequency.

8. The definition of “smoking” in this school-based survey is different from the definition adopted in the Thematic Household Survey (THS). For the definition of “smoking” in the THS, please refer to the Explanatory Notes of this report.

Rounding of figures

9. There may be a slight discrepancy between the sum of individual items and the total as shown in tables due to rounding.
